ACKNOWLEDGMENT

On behalf of all the members of group 3, I would like to thank you all for the hard works, supports to make this eProject complete successfully. Especially, Ms. Le Mong Thuy, our teacher, she helped us a lot from the day that we started to study at FPT Aptech. With this eProject, she has guided us with her enthusiasm and rigorous, because of her guiding, we would be able to finish this project. Besides, I want to thank all the team member of group 3, each of the team member has been working in order to complete this project. The last but not least, we would like to say thank you to our family for always supporting us, creating the best conditions for us to focus on the project, and putting faith in the dreams we pursue.

SYNOPSIS

A-1 uniforms was founded in 2016 and since then they have been one of the leading **Uniform Manufacturers in the country**. they supply many schools in country and they give them the best uniforms. They supply affordable school uniforms for girls and boys. When clients come, they cater to client's vision. As a team of professionals they understand what clients want and deliver the best results.

At A-1 uniform designs are innovative and there are always fresh and new ideas for each and every client. The textiles are of excellent quality and they make each uniform according to the size requirements given. The fit is ingenious and they provide with the best. A-1 uniform is a part of a continuous strategic process of creative inputs from experts in the field. They consider each client differently and ensure the satisfaction with the end results. Each client is given the uttermost importance.

The entire team works together to achieve the same goal.

PROBLEM DEFINITION

The Web site is to be created based on the following requirements.

1. The home page must describe the keywords or highlight of the shop along with all navigation link defined.
2. Products should be categorized as
 - a. Shirts
 - b. Skirts
 - c. Frocks
 - d. P.T. T-shirts
 - e. P.T. shorts
 - f. P.T. track pants
 - g. Belts
 - h. Ties
 - i. Logos
 - j. Socks
3. The “Contact Us” page should have the Address of the Company and the mail address which when clicked will invoke the local mail client from where they can send an email. Address of the Company should be displayed using GeoLocation API (e.g. GoogleMaps).
4. Contact Us page should also include the address and contact details of various outlets of A-1 uniforms in the city.
5. About us page
6. Feedback
7. Navigation must be smooth.
8. Color combination must be uniform throughout the project.

CUSTOMER'S REQUIREMENTS SPECIFICATIONS (CRS)

Client: A1UNIFORM

Business/Project Objective:

A-1 uniforms was founded in 2016 and since then they have been one of the leading Uniform Manufacturers in the country.

Looking at the demands and increasing power of web, the management of A-1 are looking for hosting a website of their products which will be easier to reach to them.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Input to the system:

- Filter a list of products for that user selected in Home & Shopping online page
- Leave comment to the 'A1Uniform' customer service in Feedback page
- Send mail to the A1Uniform company in Contact Us page.

Output from the system:

- Displaying result of products for that user selected in Cart page
- Display the local mail client when user click to the mail address in Contact Us page.

Process:

- Show and short the product in website.
- Show and sort size of some product.

Expected delivery date:

List of deliverables:

- Document Word.
- User Guide.
- Source code.

Hardware/ Software Requirements:

Hardware

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

Software

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

SCOPE OF THE WORK (IN BRIEF)

After a long and detailed discussion, our group has decided to create a website contain the following webpages:

1. **HOMEPAGE:** Display information about newest-selling products, an introduction about fun-zone
2. **PRODUCTS:** Display all the products according to the output.
3. **CART:** Display all the added products.
4. **PAYMENT:** Display the total amount and methods for payment.
5. **FEEDBACK:** Display a text area for comments and information of the commenter.
6. **CONTACT:** Address of the Company, email...

Architecture and design of the system

9. Javascript

1. This script is using show img and information when hover in list name of sections in experience page. It is implemented with the support of the JQuery library. And a script is using show the picture in fullscreen mode in Experience page.

```

<script>
    //script for hover listname-img
    var listing = document.getElementsByClassName("img_invi");
    var listname = document.getElementsByClassName("but_hover");

    for (let a = 0; a < listname.length; a++) {
        $(listname[a]).hover(function () {
            listing[a].style.display = 'block';
        }, function () {
            listing[a].style.display = 'none';
        })
    }

    // script for modal pic
    // Get the modal
    var modal = document.getElementById("myModal");
    var img = document.getElementById("myImg");
    var modalImg = document.getElementById("img01");
    var captionText = document.getElementById("caption");
    img.onclick = function () {
        modal.style.display = "block";
        modalImg.src = this.src;
        captionText.innerHTML = this.alt;
    }

    // Get the x that closes the modal
    var span = document.getElementsByClassName("close")[0];
    // close the modal
    span.onclick = function () {
        modal.style.display = "none";
    }
</script>

```

2. This script is using show count down a time event start in what up page.

```

<script>
    // Set the date counting down
    var countdownDate = new Date("Sep 1, 2021 21:00:00").getTime();

    // Update the count down every 1 second
    var x = setInterval(function () {

        // Get today's date and time
        var now = new Date().getTime();

        // Find the distance between now and the count down date( by seconds)
        var distance = countdownDate - now;

        // Time calculations for days, hours, minutes and seconds
        var days = Math.floor(distance / (1000 * 60 * 60 * 24));
        var hours = Math.floor((distance % (1000 * 60 * 60 * 24)) / (1000 * 60 * 60));
        var minutes = Math.floor((distance % (1000 * 60 * 60)) / (1000 * 60));
        var seconds = Math.floor((distance % (1000 * 60)) / 1000);

        // Output the result
        document.getElementById("timer").innerHTML = days + "d " + hours + "h "
            + minutes + "m " + seconds + "s ";

        // expired when the count down is over
        if (distance < 0) {
            clearInterval(x);
            document.getElementById("timer").innerHTML = "EXPIRED";
        }
    }, 1000);
    // 1000=1s setInterval function use for show expression everyevery interval(here is 1000)
</script>

```

3. script use for auto play, play and pause video in home page

```

</footer>
<script>
    var video = document.getElementById("video");
    window.onload = function () { video.play(); }
    function myFunction() {
        if (video.paused) {
            video.play();
        } else {
            video.pause();
        }
    }
</script>

```

4. script use for animation in hightechland page

```

<script>
    var heart = document.getElementById("heart");
    var ironman = document.getElementById("ironman");
    var ironbg = document.getElementById("ironbackground");
    var irontitle = document.getElementById("irontitle");
    heart.onclick = function () {
        ironman.style.display = 'block';
        ironbg.style.display = 'block';
        irontitle.style.display = 'block';
        heart.style.animationName = "iromanheart";
        heart.style.animationDuration = "1.5s";
        heart.style.animationFillMode = "forwards";
    }

    // spider
    spider = document.getElementById("spider");
    spiderbg = document.getElementById("bg_spider");
    spider_tt = document.getElementById("spider_title");
    $(document).ready(function () {
        spider.style.display = "block";
    })
    $(spider_tt).hover(function () {
        spider.style.animation = "hover1 3s infinite";
    }, function () {
        spider.style.animation = "spiderman 3s ease-in-out forwards";
    })
</script>

```

5. script use for filter product in leisure and dinning page :8 section and 2 kind of product(leisure-dinning).

```

$(document).ready(function () {
    var all = document.getElementById("allchecked");
    var listcheck = document.getElementsByClassName("area");
    var listLD = document.getElementsByClassName("LandD");

    // getjson
    var url = "ds.json";
    $.getJSON(url, function (data) {
        // checkjson
        // console.log(data);

        // checkbox all
        $("#allchecked").change(function () {
            if (all.checked === true) {
                for (let a = 0; a < listcheck.length; a++) {
                    listcheck[a].checked = true;
                }
            }
        });

        // function to get info from json
        $(".tick").change(function () {
            var product = [];
            var filter = new Set();
            var count = 0;

            for (let a = 0; a < listcheck.length; a++) {
                for (let b = 0; b < listLD.length; b++) {
                    if (listcheck[a].checked === true && listLD[b].checked === true) {
                        data.forEach(item => {
                            if (item.class === listcheck[a].value && item.ld === listLD[b].value) {
                                filter.add(item); count += 1;
                            }
                        });
